

**PRESS RELEASE**

FOR IMMEDIATE RELEASE:

## **InSite Services Granted Patent Pending Status for Invention of IntelliSite™ Accounts Payable Invoice Management System**

DALLAS, TX --- February 26, 2007 – InSite Services, a leading provider of on-demand/SaaS business process management technology services, today announced that the United States Patent and Trademark Office (USPTO) has received and acknowledged the company's patent application filing for its invention of a unique and innovative invoice management system for accounts payable automation. IntelliSite™ Invoice Manager is a breakthrough on-demand accounts payable invoice management system enabling organizations to reduce invoice processing costs by 30% to 70%, increase expense control, and ensure compliance with Sarbanes-Oxley.

“Traditionally, only the very largest companies have had the resources to spend the millions of dollars typically required to build and manage an in-house solution for accounts payable automation,” said Jeff Anderson, president of InSite. “IntelliSite™ represents an on-demand managed solution that delivers instant return on investment enabling companies to realize the significant benefits of accounts IntelliSite™ can be deployed in a fraction of the time compared to that of a typical in-house solution for little to no upfront investment.”

### ***A Complete Managed Solution***

The patent pending methods and systems of IntelliSite™ are designed to eliminate all paper and manual functions from the accounts payable invoice management process. IntelliSite™ digitizes paper invoices, extracts invoice data, matches invoices to purchase orders, codes invoices, electronically routes invoices from input to approval with existing accounting systems, and provides real-time invoice tracking and expense analysis. Clients define all business rules for invoice routing and approval and maintain 100% control over all vendor disbursement decisions. As a result, companies are able to offload the non-strategic manual business functions of invoice processing and help focus personnel on making better expense management decisions.

“IntelliSite™ is completely configured to the unique needs of each client and does not require any investment in software or infrastructure,” said Doug Brennecke, vice president of technology and solutions at InSite. “We’ve designed the processes and system to deliver the superior level of reliability, security, and accuracy that organizations demand for mission critical business processes.”

### **ABOUT INSITE SERVICES**

Headquartered in Dallas, InSite Services is a leading provider of on-demand/SaaS document management and workflow automation services that help organizations improve information management and streamline business processes. InSite's flagship solution, IntelliSite Content Manager<sup>SM</sup>, provides companies with a fully integrated outsourced service that electronically captures, stores, routes, and archives informational assets. From web-based document storage and retrieval to electronic workflow and eForms that automate key business processes, InSite enables companies to focus on what they do best instead of pushing paper.
